

# NP+ 19-38-0-7S

## BINARY FERTILIZER, COMPLEX GRANULE

### Use

NP+ are nitrogen and phosphate-based complex fertilizers, enriched with secondary and micro nutrients. These formulations increase agricultural productivity, prevent soil degradation, and offer highly concentrated solutions to improve fertility of deficient soils. They can be applied directly or used in blends.

### Packaging

- In bulk
- 50 kg bags
- Other : available on request

### Characteristics

#### Physical Characteristics

PH : 7.5  
Loose density : 0.90  
Taped density : 1.02  
Physical State : Granule  
Appearance : Light brown

#### Chemical characteristics

Nitrogen : 19% (N)  
Phosphorus : 38% (P2O5)  
Sulfur : 7.5% (S: Sulfate origin)
